 /nikunj-nasit

I am an experienced website developer with more than 3 years of expertise in handling both frontend and backend development. My skillset included proficiency in developing single-page application using technologies like Vue.js as well as proficiency in PHP and Laravel framework. Throughout my career, I have excelled in senior developer roles and have extensive experience in leadership, where I have successfully diversified and managed various projects.

SKILLS

- **FRONTEND:** HTML, CSS, Bootstrap, JavaScript, JQuery, Vue JS (Es5, Es6)
- **BACKEND:** PHP, MySQL, Laravel, HTTP Restful Apis, JSON Web Token, Sequelize CLI
- **Tools:** GitHub, Bitbucket, Asana, Trello, Slack, Linux, Aws Server
- **IDE:** PhpStorm, Visual Studio Code

EDUCATION

- IT Engineering | Shantilal Shah Engineering College, Gujarat *CGPA: 7.45 | (Aug '17 – Jun '21)*
- XII (Science - GSEB) | Samarpan Techno, Surat *72 % | 2017*

EXPERIENCE

- Full Stack Developer | CodeTrinity IT Services *Feb '21 – May '24*
- Web Developer – Intern | CodeTrinity IT Services *Feb '21 – Apr '21*

PROJECTS

- **Wishopping – Ecommerce Platform**
Wishopping is a comprehensive e-commerce platform developed using Laravel and Vue.js. It features a single-page application design, seamlessly integrating functionalities for vendors, users, and administrators. From product browsing to checkout, Wishopping offers a streamlined shopping experience for all stakeholders.
- **FoodKnot – Restaurant Management System**
FoodKnot is a comprehensive restaurant management system built with Vue.js and Laravel, offering a seamless single-page application experience. Users can easily scan and input details, triggering automatic setup for table selection, order timing, and floor-wise table management. It streamlines restaurant operations, enhancing efficiency for both staff and customers.
- **Auction – Player Auction System for Sports**
Auction is a player auction system designed for sports tournaments. It features an admin panel for creating tournaments, teams, and adding players, facilitating seamless auctions. Built with Vue.js and Laravel, it simplifies the process of managing player auctions for various sports events.

AWARDS

- **Constant Performance of the year at CodeTrinity, Surat:** I am working as a backend developer. I am developing a website in vue + laravel. I got a constant performance of the year award in 2022 in codetrinity working as a full time backend developer.
